

PARTICULAR SPECIFICATION
APPENDIX E
ZONE OF INFLUENCE OF WORKS

ZONE OF INFLUENCE OF WORKS

1. The proposed zones for carrying out the building construction and building impact assessment are as shown in Authority's Drawings.
2. The buildings and infrastructures in the proposed zones refer to the minimum areas for carrying out the building condition survey and building impact assessment. Notwithstanding the proposed zones shown in Authority's Drawings, the Contractor shall comply in accordance with BCA's "Guidelines on pre-construction survey prior to carrying out construction works".
3. The Contractor shall determine the zone of influences for his works, and where necessary, to carry out building condition survey and building impact assessment on additional buildings beyond the specified minimum zones.
4. In the vicinity of the contract interface, the Contractor shall coordinate and share the building condition survey reports with the adjacent contractors.
5. The Contractor shall take into consideration the combined effect of the settlement due to the construction of the adjacent stations at the contract interfaces. The Contractor shall coordinate and obtain the settlement information from the designer of the ERSS of the adjacent contract where applicable.
